Addressing Core Federal Needs

Core Requirements Met by Meridian LMS

Compliance

Easily meet federal compliance training, SF-182 workflow, and EHRI reporting requirements.

Accessibility

Designed to meet WCAG 2.0 Level A and AA, and Section 508 standards to ensure accessibility for all users.

Security

Meridian's platform is FISMA & SOC II Type 2 compliant, supports CAC/PIV cards, and is FedRAMP ready, ensuring the highest levels of data security.

Meridian LMS Key Features

Deployment Flexibility

Meridian LMS offers on-premises, private cloud, and multi-tenant public cloud solutions, providing federal organizations with the flexibility to choose the deployment model that best fits their security and operational needs.

Comprehensive Reporting

In-depth training dashboards and actionable insights monitor training progress and certifications.

Administrators can also send automated notifications to ensure training stays on track and is completed before due dates, helping federal agencies stay ahead of regulatory requirements.

Extended Enterprise Training

Securely extend training to contractors, partners, and citizens, ensuring that all stakeholders receive consistent and compliant learning experiences.

Blended Learning Capabilities

Support for both synchronous and asynchronous learning, including classroom training, eLearning, and video conferencing, ensuring that federal employees can access training in a format that suits their needs.

Enhancing Workforce Capabilities

Centralized management of staff training and certifications. Recruitment aligned with current and future skill needs. Tracking all learning activities, whether online, in class, or in the field.

Why Meridian LMS?

Meridian Knowledge Solutions is a trusted partner for federal organizations, offering a learning management system (LMS) tailored to meet the stringent demands of the public sector.

With over two decades of experience, Meridian has successfully implemented LMS solutions for Federal Civilian, Department of Defense, Intelligence, and System Integrator organizations.

Our platform complies with federal security standards like NIST and FISMA and offers flexible deployment options, including on-premises, private cloud, and multi-tenant public cloud environments.

Our team's extensive background in learning and development sets Meridian apart, backed by 28 years of experience. As a US-owned company with all personnel, development, and support based in the United States, we provide secure, reliable service to federal agencies.

Our commitment to excellence is demonstrated through personalized support, including a dedicated Customer Success Manager for each client, helping agencies confidently navigate LMS implementation and ongoing management.
