

Meridian LMS for State & Local Government

- Streamline Onboarding
- Ensure Compliance
- Improve Workforce Efficiency

82% of agencies cite staff recruitment and retention as top workforce priorities.

Addressing Core State & Local Needs

Core Requirements Met by Meridian LMS

Blended Learning

Supports various learning formats, including in-person, online, and other mediums, to ensure comprehensive and flexible training programs.

Compliance

Supports ongoing audit readiness and ensures training programs meet mandatory certification and regulatory requirements.

Security

Robust measures protect sensitive data by adhering to stringent government security demands.

Accessibility

Designed to meet the highest standards of 508 accessibility and usability.

Meridian LMS Key Features

Deployment Flexibility

Meridian LMS offers on-premises, private cloud, and multi-tenant public cloud solutions, providing state and local agencies with the flexibility to choose the deployment model that best suits their security and operational needs. This flexibility allows agencies to select a solution that aligns with their IT infrastructure while maintaining the highest levels of data security and compliance. Additionally, our platform is fully customizable, enabling agencies to tailor the LMS to meet their unique needs, including branding, workflows, and user interfaces.

Comprehensive Reporting

In-depth training dashboards and actionable insights allow for **near** real-time monitoring and reporting on training progress and certifications, enabling agencies to stay ahead of regulatory requirements. Meridian's robust reporting tools help agencies quickly identify training gaps, monitor compliance, and make data-driven decisions to improve workforce development initiatives. Our platform's reporting features are highly customizable, allowing you to create reports that meet your specific organizational needs.

Extended Enterprise Training

Securely extend training to contractors, partners, and citizens, ensuring that all stakeholders receive consistent and compliant learning experiences. These capabilities enable agencies to deliver critical training to a broader audience, including external partners, ensuring that everyone involved in government operations is equipped with the necessary knowledge and skills. The LMS can be customized to control access levels and content delivery, ensuring that **internal and** external users receive tailored training relevant to their roles.

Why Meridian LMS?

Meridian Knowledge Solutions is a trusted partner for state and local government organizations, providing a robust learning management system (LMS) designed to meet the specific demands of the public sector.

With over 28 years of experience, Meridian has implemented LMS solutions across various government organizations, ensuring that training programs align with organizational goals and comply with federal and state regulations, including 508 and WCAG accessibility standards.

As a US-owned company, Meridian sets itself apart with a US-based team of experts in learning and development. Our extensive eLearning knowledge allows us to offer unmatched support to government organizations, helping to navigate the complexities of LMS implementation and ongoing management.
